

Pantry Pal

A side project born out of love

I built an app so my wife never has to ask 'what's for dinner?' again.

- 01 Quick recipe reminder
- 02 Nutrition at a glance
- 03 Smart shopping checklist

Swipe →

The story

Sound familiar?

- 01 Has 30 recipes in her head but forgets half at the wrong moment
- 02 No idea which meal is actually good for the family
- 03 Supermarket trips without a plan means forgetting things and impulse buying

So I built her something.
